Mr. Thomas McCloud, Jr.
Intercollegiate Broadcasting System, Inc.
Bethlehem, Pa. 18015

Dear Mr. McCloud:

Enclosed are two lists of colleges for the Campus Radio project we have been discussing with you. One list is of 156 colleges accredited by the Engineers Council for Professional Development. The other is a list of 98 schools approved by the American Chemical Society. You will note that on the engineering list of 156 schools, we could find only 92 listed campus stations. On the chemical list of 98 schools, we could find only 63 listed campus stations.

I would greatly appreciate it if you would go over both lists and check them for accuracy as far as stations are concerned. If we have left any out, would you please pencil them in? Also, we have listed the IBS affiliation where we found it. If we have left any out, could you also pencil them in? Finally, we have assumed that all IBS affiliated campus stations would carry commercials. If there are any educational FM stations in the group that will not carry commercials, would you indicate which ones they are.

I have been in touch with Messrs. Freedman, Robins and Crompton, and I trust they all have brought you up to date on our discussions. While we cannot be certain of the project, it does appear as if there is sufficient interest for us to proceed as rapidly as possible. I would therefore appreciate hearing from you soon.

Sincerely,

Irvin P. Sulds
President
